

PSA-6 Tackified Acrylic PSA

Product Application & Description

PSA-6 is an extremely aggressive tackified acrylic pressure sensitive adhesive designed for demanding applications requiring resistance to harsh environments, specifically for resistance to petroleum-based oils, organic solvents and humidity. PSA-6 demonstrates excellent adhesion to low surface energy substrates such as polyolefins and most powder coated surfaces.

Shelf Life & Storage

It is recommended to consume all materials within 1 year from date of purchase. Best if stored in a controlled environment (72°F and 50% RH) and out of direct sunlight.

Technical Data	
Test Method/Performance Parameter	Result/Performance Properties
180° Peel @ 24 Hours (PSTC-101)	5.0 lbs./in.
180° Peel @ 24 Hours (HDPE & LDPE Substrate)	4.5 lbs./in.
Shear (1 lb./0.25 in. ²)	0.5 Hours
Service Temperature	-20°F to 300°F (-29°C to 150°C)
Application Temperature	40°F to 120°F (5°C to 49°C)

Tested at 1.0 mil. of adhesive on 1.0 mil. polyester film to stainless steel. HDPE substrate where designated.
