

# UltraGOLD

All Foils supplies coated aluminum with a hydrophilic film ideal for use in HVAC applications. Our exclusive polyester coating provides aluminum finstock with advanced, self-healing protection against harsh climates and humidity.

## UltraGOLD Description

Aluminum is chemically degreased, primed and lacquered on both sides with a thin layer of highly-durable hydrophilic coating that resists extreme amounts of moisture and condensation.

# UltraGOLD Advantages

- Delivers excellent formability
- High durability, low friction protective coating
- Coats complex geometries without impacting design tolerances
- Superior corrosion resistance
- Good adhesion on aluminum surface
- No risk of coating pulverization

## UltraGOLD Performance

Test	Method	Result
Corrosion Resistance (3,000 hours)	ASTM G85	Pass
Adhesion	Cross Hatch	Pass
Antimicrobial	ASTM G21	Pass
Flexibility	T-Bend	Pass
Cleaning	409 Test	Pass

## Aluminum Technical Specifications

Alloy	Color	Temper	Thickness	Width
1100, 7072*	Champaign Gold*	0, H18, H19*	0.080 to 0.250mm (0.003 to 0.10")	Up to 54"
*Other alloys, colors and tempers available upon request.
